Fast Facts about the Vytek L-Star

L-Star is the Stone, Tile & Glass industries' ONLY large format, high speed, laser engraving system. Many jobs can be completed in up to 50% less processing time.

The L-Star outperforms the competition with engraving speeds up to 150 ips - which means a square foot can be completed in under 6 minutes.

L-Star features flying optics, fire-on-the-fly (no wait, uninterrupted start-to-finish engraving), and high performance servo motors.

Shop productivity will spike up to 5 times faster with the highest throughput - increasing your capabilities and competitive marketability, while reducing costs.

Plus, the new L-Star produces better quality with short turnaround times. Which means that, in some cases, you can offer your customers same day delivery on engravables, a competitive advantage in today's "want it now" business environment.

L-Star: Real Solutions for Real Jobs!

SPECIFICATIONS	L-STAR LASER ENGRAVER
Overall Dimensions:	
Length:	120" (3048 mm)
Width:	74.5" (1892 mm)
Height:	47" (1193 mm)
Weight (approx):	2500 lbs (1134 kg)
Work Area:	
X axis:	48" (1219 mm)
Y axis:	96" (2438 mm)
Table Travel	12" (304 mm)
Clearance	16" (406 mm)
Drive type x and y	AC Brushless Servo
Laser types	CO ₂ up to 200 watts
Speed	Up to 150 ips (laser dependant)
Interface	HPGL, G&M and Raster
DPI	Up to 1200 DPI
